

## EXCEPTIONAL DESIGN

A **Blackbird Boat** is *more than just* a boat, it is the realization of the **finest materials, meticulous craftsmanship and an inspired vision.**

The journey of the creation of a **Blackbird begins with an idea** and is then expressed in the architectural plan. The design of the mahogany boat begins in the mind of the customer and then is visualized on the page by the Blackbird designers, where every detail is methodically planned out. The design is then translated into a technical blueprint, perfected by the Blackbird

architects, ensuring superiority in even the smallest element. Every single Blackbird is completely custom from the start, **creating a one-of-a-kind masterpiece, unlike any other.**

Once designed, our team of engineers purposely handcraft every Blackbird with care and attention to detail, down to the last bolt. We source the best materials from around the globe to match the integrity of the Blackbird boat, from the rich mahogany wood from South America to the leather seats, sourced from Southern Germany.

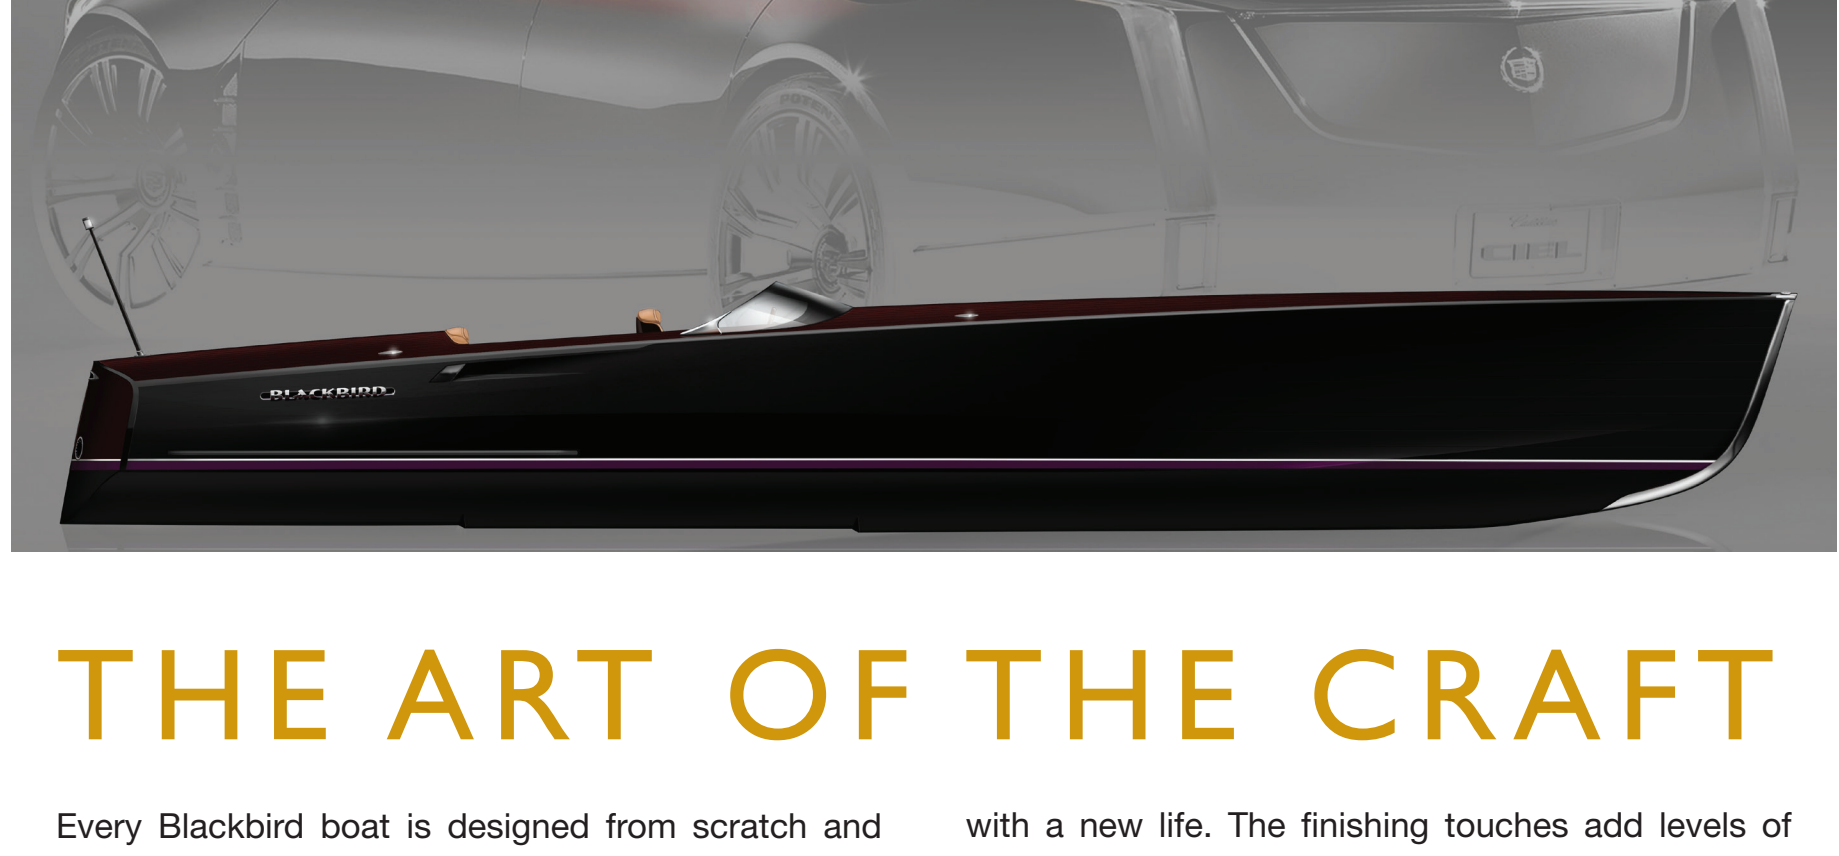

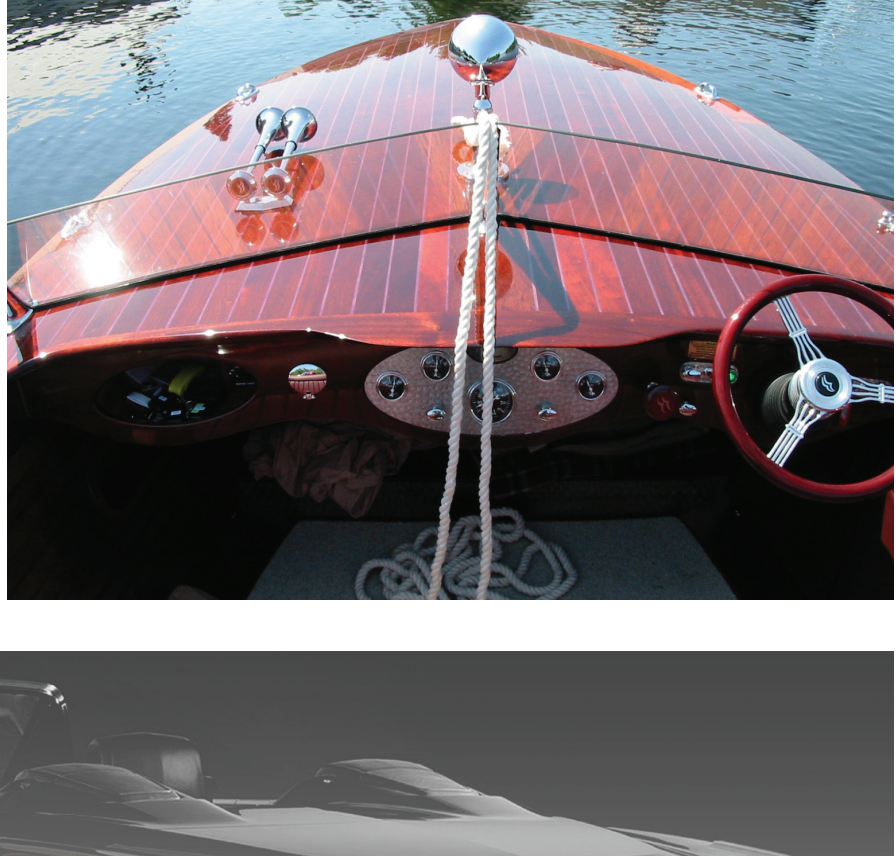

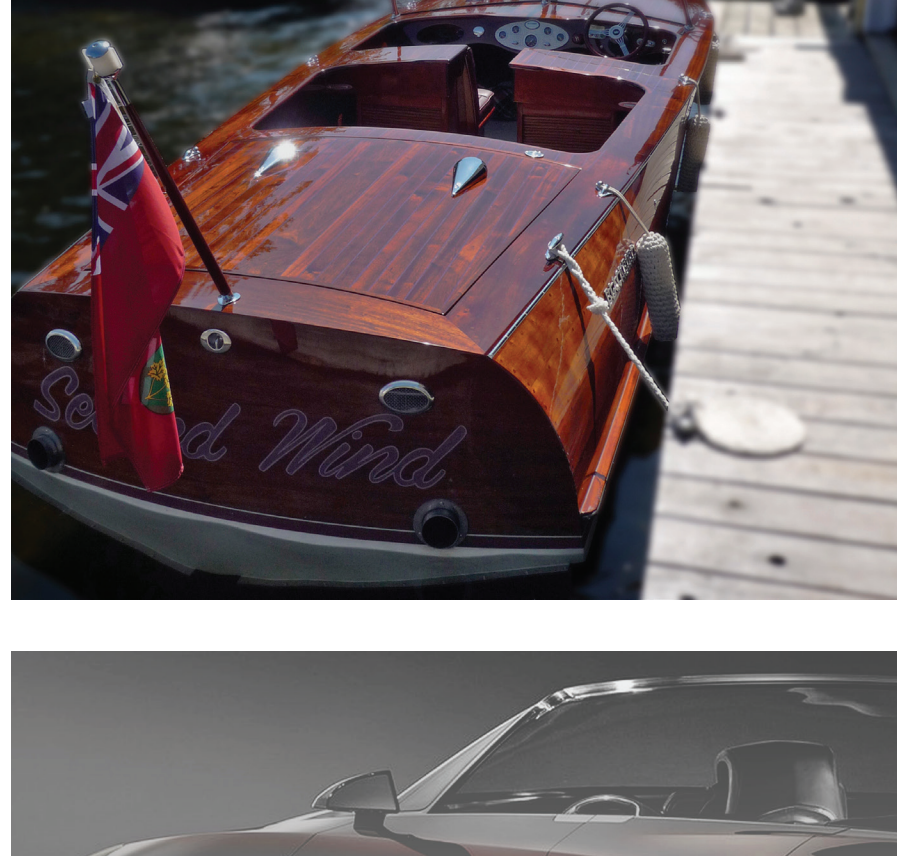

## TIMELESS ELEGANCE

**Blackbird Boatworks Limited is based in the Muskoka region in Ontario.** Every Blackbird boat is *designed, engineered and hand-crafted on-site*, with only the highest quality materials in the world. For the past 20 years, Blackbird Boatworks has been perfecting the art of the mahogany boat.

Throughout time, the classic beauty of a mahogany boat has been a status symbol. Set far apart from the rest, a Blackbird boat stands out from the crowd, the rich colours and design in stark contrast to the typical white boat. Because every Blackbird

is custom-created and designed with the unique purchaser in mind, every piece is exclusive and limited.

The classic style and sophistication of the mahogany boat has been exemplified throughout the decades and by the people who took them to the waters. The hands-on building is the height of craftsmanship that is a lure to the discerning boater. **The mahogany boat holds a sense of history, yet is undeniably sleekly modern.** The cachet of the mahogany boat encapsulates timeless elegance.

## THE ART OF THE CRAFT

Every Blackbird boat is designed from scratch and suited to customer's preferences. A hands-on build ensures that every last detail is cared for and worked on until it reaches perfection. The construction and crafting of a Blackbird is a journey and we take our time to work methodically on every element, by hand. **Our passion and skill shines through, making every boat a showpiece.**

At our building site in Muskoka, we source materials from all over the world. The mahogany, that is stained to the colour choice of the customer, is sourced from South America. **We put a focus on sourcing our mahogany in an environmentally friendly way.** The trees that are used are ones that have freshly fallen naturally. Rather than cutting down these beautiful trees, we utilize the natural elements, without harming them. Once the fallen tree is removed, we plant a new tree in its place, to continue the cycle and replace it

with a new life. The finishing touches add levels of elegance and luxury that are unique to every Blackbird, with the **same leather used for Bentley automobiles.** This leather is sourced from Germany and is known as one of the best and most high quality in the world.

As the **only new boat builder in Ontario**, we place great pride and care into every step of creating our masterpieces and are designed to be used in both fresh and saltwater.

At Blackbird Boatworks, we truly go above and beyond in every step, from sourcing the wood in an ecological way, to the CNC equipment used by the team to cut the frames, all the way to the aftercare, for the lifetime of your Blackbird. Along with a 10-year warranty on every boat, we also provide **unlimited servicing for its lifetime and a yearly tune-up to ensure that your Blackbird is always at its peak performance.**

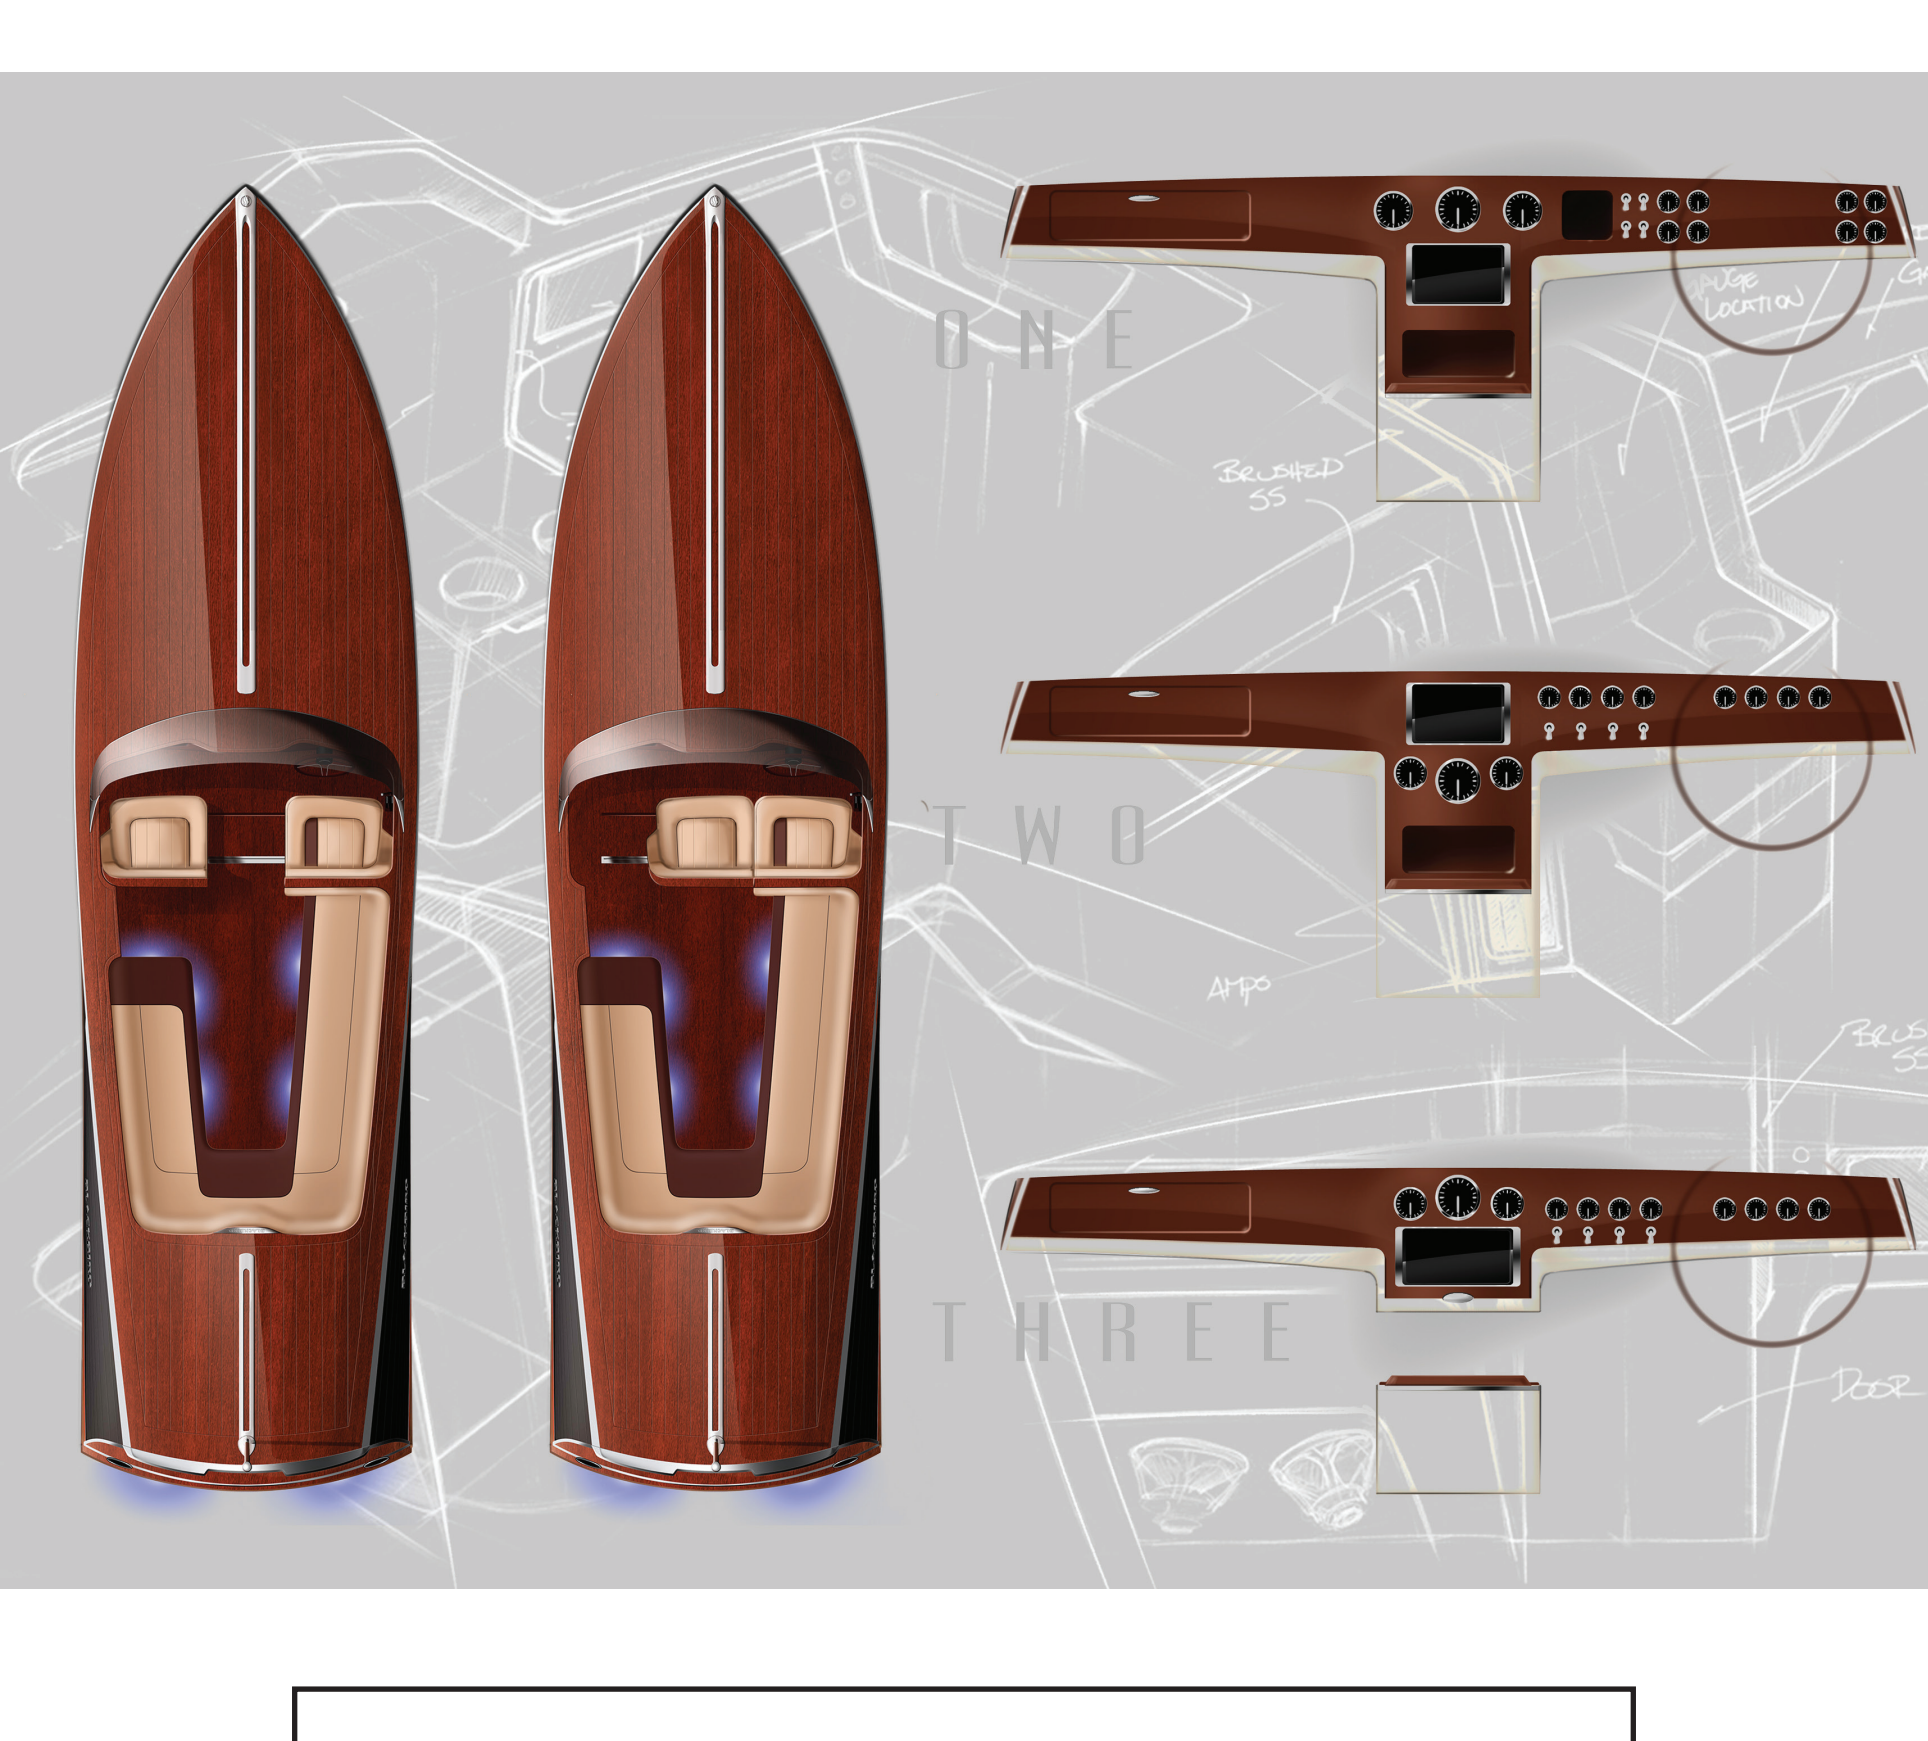

## BESPOKE TO YOU

While every Blackbird is unique in its own right, **our bespoke custom creations ensure that your Blackbird is yours alone and a perfect reflection of you.**

**Every last element can be custom designed and suited to your taste.** From the colour of the wood itself, to the design of your boat name, to the colour of the leather, the stainless steel finishes and custom embroidery. The small details make the biggest impact and every part of a Blackbird is to the owner's specifications and we can work together to create the perfect boat with personal design elements.

**A Blackbird is more than just your boat,** it is a statement of luxury, refinement, and *bespoke yours.*
